

Billi™

Quadra Range

Elegant styling and space-saving design

Our range of boiling, chilled and sparkling integrated water dispensers are designed and manufactured to be energy efficient, offering customers the very best in innovation, superior performance and reliability.

Advanced technology

Water-Cooled Technology

Our boiling and chilled water-cooled systems utilise heat-exchange and energy reclaim technologies and are more energy-efficient than air-cooled systems. Plus, Billi's water-cooled boiling and chilled systems require no unsightly cupboard ventilation and operate more quietly than air-cooled systems.

Safety first

Billi's splash-free boiling water delivery electronically varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup. All Billi X Series dispensers insulated remaining cool to touch and are supplied with a safety switch as standard to lock boiling water flow when needed.

Premium filtration

Billi's range of premium filters are equipped with patented Fibron-X multi-layered structure which provides superior water quality.

Heat exchange

Billi's unique Heat Exchange Technology reclaims the waste heat energy produced in the chilling process to preheat the boiling water. This allows boiling water to reach optimal temperature more efficiently while achieving substantial energy savings.

Adjustable temperature and carbonation

Boiling and chilled units are fully temperature adjustable through menu settings, while Boiling Chilled and Sparkling units also come with adjustable carbonation at the simple turn of a dial.

Water options

Option	Boiling	Chilled	Sparkling
Quadra			
Quadra Sparkling			

Configuration

Quadra boiling and chilled are water cooled and do not require cross ventilation. No cabinet cut outs needed during the installation process.

All air-cooled products including the Quadra Sparkling range, require appropriate joinery ventilation.

Please refer to installation guides for more details.

Technical specifications

Model	Suggested number of people	Boiling water delivery cups per hour [^]	Chilled water delivery cups per hour	Height (mm)	Width (mm)	Depth (mm)
Quadra Compact	Up to 20	Up to 100	150	340	315	365
Quadra 440	Up to 40	Up to 150	175	340	315	465
Quadra 460	Up to 60	Up to 180	175	340	315	465
Quadra 460 Sparkling	Up to 60	Up to 165	200	C&S Boiling 410 315	340 420	255 465

[^] Based on a set volume of water being drawn every 30 seconds at an inlet temperature of average temperature 21°C. Each cup is equivalent to 170ml. Usage patterns and draw-off methods can impact recovery.
