

Billi™

Eco Range

Energy-saving and compact design

Eco units are designed and manufactured as energy efficient filtered water systems that offer customers the very best in innovation, superior performance, space-saving and reliability.

Features and benefits

Safety first

Splash free boiling water delivery electronically varies the water flow, slowing momentarily to eliminate splashing as the water first enters the cup. All Billi X-series dispensers are supplied a safety switch and insulation, remaining cool to touch.

Premium filtration

Billi's range of premium filters are equipped with patented Fibron-X multi-layered structure which provides superior water quality.

Boiling, Chilled & Sparkling option

The CO₂ injection system used in the Billi Sparkling range ensures the saturation of CO₂ in the water is high which means it has a better life and, consequently, taste.

Adjustable carbonation

Adjust the level of sparkling to suit your taste with adjustable controls up to 5 bar of CO₂ pressure.

Adjustable chilled temperature

A simple adjustable control knob allows the chilled water temperature to be raised to 15°C or lowered to 6°C for perfectly chilled, refreshing drinks, with your required temperature being quickly reached and maintained.

Ice Bank cooling technology

Billi's Ice Bank technology is available on the Alpine Sparkling range. With a semi-frozen core reservoir, both chilled and sparkling supply pass through enabling greater chilling capacity and carbonation.

Configuration

Billi under-counter units have one of the smallest installation footprints, making the most of your space.

All air-cooled products including the Eco Sparkling range, require appropriate joinery ventilation.

Please refer to installation guides for more details.

Technical specifications

Model	Suggested number of people	Boiling water delivery cups per hour	Chilled water delivery cups per hour		Height (mm)	Width (mm)	Depth (mm)
Eco	Up to 10	90	60		340	180	500
